

DECK SAW

Versatility

We manufacture and repair most brands of Package Saw and Deck Saw bars.

Deck saws with saw bars up to 12 ft. long are used to cut the largest of logs, and are also used to split logs length-ways so they can be introduced into the mill flow and processed with smaller capacity equipment. These saws are also utilized in a variety of custom applications, ranging from tie operations to firewood processing plants.

FEATURES

- Saw bar lengths available from 3 ft. to 12 ft.
- Three-phase electric motor drives available from 7.5 HP through 25 HP.
- Design features the industry-famous "Tuffee" mandrel for durability.
- Fully-automatic chain oiler.
- Compact hydraulic power unit drives saw bar movement.
- Quick chain tension take up.
- Thousands of units in operation world-wide.
