

MS SYSTEM 2000

The exceptional value, hydraulically powered, package cut off saw.

Full line of
package
cut off saws
to meet
every
need

This saw allows a single operator to complete a quality cut cycle in under 55 seconds. The sawbar is guided through the cut by the overhead support structure, allowing it to consistently maintain a cutting tolerance of $\pm 1/16$ ".

This specially designed, precision chain saws thin 3/8" kerf gives you more efficient lumber recovery and a surface finish as good or better than a conventional trim saw.

Standard machines handle 16' or 20' lumber packages.

The onboard hydraulic power unit has a 1HP motor driving a gear pump. The MS System 2000 comes complete with hydraulic cylinder and controls for powered sawbar actuation through the cut. Automatic bar oiler system is a standard feature of this unit.

After the package of lumber is on the support frame against the alignment stands the saw is precisely manually positioned using the laser light sawline guide for the next hydraulically actuated cut cycle.

Available as a totally gasoline powered unit.

OPTIONS:

- Electronic length measurement with digital readout
- Powered saw carriage positioning
- Modular infeed/outfeed decks
- Modular evenending system

Made with pride in the USA

This saw features high quality, locally available components and can be maintained without the need of outside factory technicians or special equipment.
